

### **WATERING DAY RESTRICTIONS END** **Permanent Provisions Remain in Place**

On May 17, 2017, TCWD's Board of Directors adopted a resolution that ended the Water Conservation Level 1 Water Supply Shortage Conservation Restrictions, including the watering day limitations. This action was in direct response to Governor Brown's Executive Order B-40-17 which partially repealed regulations related to the Statewide urban water conservation requirements, as well as the historic rainfall that occurred during the 2016/2017 winter. The adopted resolution reaffirms TCWD's Water Conservation Ordinance Permanent Provisions and implements the existing water waste prohibitions required by the State Water Board. A postcard summarizing the watering restrictions will be mailed in July, however, you can visit TCWD's website to learn more about these restrictions, how to use water more efficiently, and how to prevent water waste.

TCWD's Board and staff want to thank all of our residential and commercial customers that helped us exceed the mandatory State Water Board regulations during the Statewide Drought Emergency. During this period, TCWD's customers responded with an impressive 27.9% reduction in water use.

*thank you*

to all of our customers  
for helping TCWD exceed the mandatory  
State Water Board Regulations during the  
Statewide Drought Emergency

### **Is Your Account Contact Information Current?**

*If a water or sewer emergency occurs that affects your home or business, could we notify you right away?*

#### **TO UPDATE YOUR ACCOUNT INFORMATION:**

Call us during business hours at (949) 858-0277, or email us at [customerservice@tcwd.ca.gov](mailto:customerservice@tcwd.ca.gov) and we will update your account.

TCWD will never sell or use your information for anything other than District business. Thank you for helping us serve you better in emergencies.

### **TRABUCO CREEK GROUNDWATER FACILITY**

#### **Seasonal Wells Provide Local Water Reliability**

As a result of the 2016/2017 winter storms, the District's Trabuco Creek Groundwater Facility, formerly known as the Rose and Lang Wells located in the heart of the canyon, produced more than 110 million gallons of local water at the time of this writing, and is still producing 360,000 gallons per day. This is significant because these seasonal wells have been dry during most of the five-year statewide drought, and the last time that the facility produced water was in 2013.

This local water production is valuable as it allows the District to save money by purchasing less imported water to meet system demands, which results in an overall cost savings for District customers.

Glenn Acosta, President  
Mike Safranski, Vice President  
Don Chadd, Director  
Stephen Dopudja, Director  
Ed Mandich, Director  
Hector Ruiz, General Manager

The Board of Directors Regular Meeting is scheduled for the third Wednesday of each month at 7:00 p.m. at the District's Administrative Facility located at 32003 Dove Canyon Drive, Trabuco Canyon. The public is encouraged to attend.

## WATER AWARENESS DAY 2017

Despite some cloudy skies and afternoon rain, the 2017 Water Awareness Day Event was an absolute blast! The Board of Directors and District staff want to thank everyone that took time out of their busy schedules to come to our Main Office on a Saturday to

*View from the front of TCWD's Conservation Garden*

learn more about the many services that TCWD provides to its customers and to enjoy some great BBQ'd food! As always, we appreciate your interest in what we do, and look forward to seeing you next year.

## DID YOU KNOW?

One minute in the shower uses 2.5 gallons of water. Your front yard can use as much or more than 60 gallons per minute!

**Get the most monthly savings by focusing on conserving water outdoors!**
